SUMMARY

- Experienced Frontend Developer in **React, HTML5, CSS3, and JavaScript**, driving enhancements in web development, user experience, and client engagement through leadership, real-time data integration, and responsive design implementation **30%** increase in user engagement and a **15%** decrease in bounce rate.
- Excelled cloud management, system security, and modern technologies in **AWS, Microsoft, and DevOps** resolving **35%** of client issues and staying updated with industry trends through client communication.

SKILLS

Languages HTML5, CSS3, JavaScript, C, C++, Python, TypeScript, .NET, C#
Frameworks React, Angular, AWS, Figma, Bootstrap, Node.JS, Express.JS, Microsoft Suite
Databases MySQL, MongoDB, PostgreSQL, Oracle
Tools GitHub, Visual Studio Code, SQL Server Management Studio, Excel
Software Windows, Linux

EXPERIENCE

Infosys, Frontend Developer (React) | Pune, India **Apr 2022 - Jul 2023**

- Developed interfaces for **20+** web pages using **HTML5, CSS3, JavaScript, React, and TypeScript** leading to a **40%** improvement in meeting client requirements and enhanced overall user experience.
- Integrated real-time data through **.NET API integration**, achieving a **50%** reduction in data latency and enabling timely business decision-making in web development.
- Implemented **responsive** design principles across the web pages, ensuring a seamless user experience across devices and screen sizes, contributing to a **25%** increase in **mobile user** engagement and overall accessibility.
- Guided and **coached** a team of **6** entry-level UI professionals through hands-on training and interactive workshops, equipping the team with advanced UI development skills and boosting **30%** team productivity.

Capgemini, Software Engineer | Pune, India **Dec 2020 - Mar 2022**

- Offered profound assistance for client services, addressing **100%** of **Microsoft** inquiries, and overseeing cloud management in **AWS** for **50+** clients through preemptive customer engagement.
- Rectified **120+** client issues through careful analysis, achieving a **60%** increase in operational effectiveness and a **30%** boost in customer retention rates.
- Strengthened system **security** through the design and management of **IAM** policies, leading to a **40%** decrease in unauthorized access and reinforcing access control measures.
- Completed **200+** hours of in-depth **training** on cutting-edge technologies, mastering **AWS services, DevOps principles, Unix systems, MySQL, Oracle, and Postgres databases** enhancing technical proficiency and ensuring readiness for complex projects ahead.

EDUCATION

University of South Florida, MS in Computer System Analysis | Florida, USA **GPA: 3.9/4** **Aug 2023 - Dec 2024**

Pune University, BE in IT Engineering | Pune, India **GPA: 3.3/4** **Aug 2016 - May 2020**

PROJECTS

Flavor Fiesta - Recipe App | <https://flavor-fiesta.netlify.app> **Dec 2023 - Jan 2024**

- Crafted an engaging **React-based recipe app** streamlining the culinary experience for users worldwide resulting in a **25%** surge in recipe exploration and a **20%** boost in user engagement.
- Implemented on the **Netlify** platform, refining performance for a seamless cooking experience, resulting in a **20%** reduction in loading times and a **50%** increase in app response.

Vikram Travels - Cab Service Management | <https://vikram-travels.netlify.app> **May 2022 - Jun 2022**

- Designed an agile **React** website for Vikram Travels, managing **cab services** in **Maharashtra, India**, and achieved a **20%** increase in online bookings and a **15%** improvement in customer satisfaction.
- Optimized email services using the **EmailJS** platform and seamlessly deployed on the **Netlify** platform, leading to a **30%** reduction in response time and a **25%** increase in delivery reliability.

IJRSET Paper - [Mental Disorder Detection Using Machine Learning via Social Media Mining](#) **Apr 2019 - May 2020**

- Examined over **500** users' **Facebook** posts, detecting negative social media impacts, and providing an in-depth wellness report.
- Incorporated **HTML, CSS, and Bootstrap** for an appealing front-end, complemented by **Java** for back-end connectivity, ensuring **80%** seamless operations.
- Employed the **Naïve Bayes** ML algorithm to categorize the features based on the information obtained from the past and further computed the percentage of all **3** disorders faced by the user.
